CONFIDENTIAL

Dear Mr. [REDACTED]:

Please find attached the most recent PCB progress reports.

Six of seven transformers have been reclassified to ~~non-PCB~~ status. Transformer PBV865202 will complete the 90-day period on December 16, 1989.

I am currently scheduling a crew to arrive at your site sometime during the first two weeks of December to replace the System 50 fluid with silicone. ENSR Operations will plan on filling all 7 transformers with silicone at this time.

I will provide more details as they are available.

Sincerely,

ENSR OPERATIONS
